

Priority Networks, Inc. (PNI) provides network services to event facilities and event producers throughout the United States and Canada. PNI provides in-house services in 10 facilities throughout the United States and has provided remote-temporary networks to some 50 other event facilities.

The PNI Convention and Event Services teams are experts in providing reliable highspeed connectivity to events around the world. PNI currently services well over 900 events per year and is the provider of choice for several of the largest show owners and event planners in the industry including: Microsoft, SUN Microsystems, Cisco, TechIT Solutions, Intershow, and Media Live International.

Priority Networks offers the most reliable and secure managed infrastructure combined with a range of competitive Internet, networking and Telecommunication products. PNI controls its own national backbone utilizing several tier 1 providers to better cover our wide range of customers. PNI employs its own engineers and technicians who are trained in the specialty of remote event networking. Our services include single T1 drops for corporate functions to multiple OC3 and network design-implementation for large events. PNI also provides permanent programs for convention centers and hotels designed to meet the needs of the individual facility. PNI's advanced telecommunication expertise allows us to manage a facility's traditional telecom infrastructure as well as next-generation digital voice solutions.

High-speed Internet connectivity has become an integral part of doing business at trade shows and remote corporate functions. PNI provides its customers the benefit of one source for their entire Internet and networking needs. PNI has the expertise and experience to provide the best possible service experience to facilities, event managements, and exhibitors.
