

Event Management

PRIORITY
NETWORKS

Priority Networks is the Event Producer's technology partner in delivering a successful event. Our standard product offerings at any given venue are designed to accommodate the majority of shows any given venue will typically handle. We have experience and strong relationships with many show organizers, and can often anticipate requirements for you based on our experience with similar shows at our varied venues.

Our standard offerings at any given venue are just a start. Priority has experience creating and managing a variety of special Internet/Network-related event services. We work with Event producers to create solutions that accommodate virtually any technical or budgetary requirement.

A sampling of special services include:

- Internet Lounge / Cyber café
- Mobile Web Conferencing and remote collaboration
- Email Stations (also picture mail & video mail)
- Show & exhibitor Information Kiosks
- Press Room or Vendor sponsored Internet access areas (wired/wireless)
- Streaming video distribution (uplink) – produced or raw audio/video feed
- Special private network & corporate VPN connectivity
- Local Area Networks for Sales, Registration or AV
- Temporary Circuits or bandwidth.
- Referrals and recommendations on equipment acquisition (purchase or rental)

These are just some examples. No matter the need, there is a high likelihood that Priority has already successfully produced a similar solution for a different facility or event.

Priority Networks technology expertise is a valuable asset to event planners who must produce successful technology shows. We have experience creating packages where access and other technologies are bundled as a standard part of the exhibition. We provide engineering assistance in the design and implementation of special networks, networked applications, or industry 'showcase' areas. We can also help with application or content hosting at the facility network to accommodate specific event requirements.

Priority Networks understands the unique environment of delivering technology at venue-hosted event. Our real-world experience makes the difference in deploying robust solutions that let event producers focus on the business side of delivering a successful event. When it comes to technology, we're the ideal partner with proven experience.
