

Priority Networks provides world class Internet connectivity, networking, and related services specifically for the event services industry. Options range from connecting a single computer to the Internet to sophisticated on-site virtual local area networks spanning multiple locations.

The most common level of service is our Priority Connect service that provides Internet connectivity for the typical event floor exhibitor location. The connection is delivered via Ethernet on a standard CAT5 cable with an RJ45 connector. Access for a single computer or device is provided as part of the base pricing with additional computers or devices that need Internet access as a standard option. The most common upgrade for large exhibits/exhibitors is our Priority-One Connect service bundle, which includes access for up to 29 computers and a minimum bandwidth guarantee of 1.5Mbps. Hub and cable rental are provided as convenience items for those who choose not to bring their own. All Internet connections are tested and connection information clearly marked to make your setup as effortless as possible. Priority Networks leads the industry in its ability to accommodate and reliably execute virtually any customer request.

Priority Networks also has unmatched experience in accommodating the needs of exhibitors with wired or wireless options off the exhibit floor for meetings, conferences, exhibits, demonstrations or attendee 'lounges'.

Video conferencing over the Internet is an exciting option, with many of our customers using their video conferencing equipment in conjunction with our network services. For customers who do not have their own equipment, a complete and affordable solution including hardware is available for rental including microphones, cameras, 17" LCD or 50" Plasma display for monitoring, and an electronic whiteboard for collaboration. These units are mobile and can be setup in your booth, or any facility location.

For all Priority Networks-provided services, we offer on-site sales and support staff who are available to consult with customers and offer on-site service with ordering, provisioning, configuration and equipment rental. Priority Networks provides network service and support to all customers for the duration of the event as part of the standard connectivity offering. Support Staff is on-site during event hours and available on-call 24/7 throughout an event.

As a service to our exhibitors, we provide IT support of client systems networking configuration when requested. Priority Networks technical personnel are available to help in this enhanced capacity with time billed at affordable 1/2-hour increments.

Our clients have frequently commented to us on their high levels of satisfaction with the service they receive from our friendly and knowledgeable staff, just look for the bright red Priority Networks shirts!
