

Venue Management

PRIORITY
NETWORKS

Priority Networks, Inc. (PNI) is the premier provider of wired and wireless Internet, networking services and Telecommunications for show management, exhibitors and attendees. We've achieved this by working closely with Facilities and Event Management, delivering high levels of customer satisfaction while generating the greatest revenue possible at venue-hosted events. We offer a range of compelling service packages that effectively address the needs of exhibitors and event planners alike. We lead the industry with unmatched responsiveness to customer requests for assistance in producing the best event experience possible.

Our focus is on being the best possible partner for your venue:

- Priority Networks offers the most reliable and secure managed infrastructure combined with a range of competitive Internet, networking and Telecommunication products.
- Priority Networks provides a proven and highly effective Technology-services marketing plan that is based on our success and best practices at other Priority Networks-managed facilities and events.
- Priority Network's excels at helping venues, show managers and event planners with custom requests and implementations. We don't say 'no' - we ask 'what?' and 'when?'

Priority Networks has the most advanced service platform available to support the provisioning and management of network-based event services. While this platform is a natural evolution of Priority Network's capabilities in providing Internet services to the event industry, it is quite revolutionary when compared to competitive offerings from other service providers or self-managed venues. Infrastructure and service deployment is specific to the needs of each venue. We don't force one solution on everyone. We work with management to create a robust, flexible, and profitable solution uniquely tailored to each venue and the exhibition markets it addresses.

While each deployed and managed solution is unique, all venues enjoy the highest-ranked service and support organization in the industry. Ask other venues, exhibition management customers, and both major and minor exhibitors – Priority is always ranked tops in customer service, support, and quality of delivered services. We're committed to your success.
